Hindi, Tamil, Kannada

PROFESSIONAL SUMMARY

Results-driven IT professional with over 6 years of combined experience in Software QA/Manual Testing and Network Engineering. Proven track record in testing government-scale applications including accounts, HRMS, and legislative systems across Kerala government projects. Holds MCSA and CCNP certifications with hands-on expertise in Windows Server infrastructure, Cisco networking, and optical fibre technologies. Adept at owning testing modules end-to-end, driving quality assurance, and collaborating across cross-functional teams.

PROFESSIONAL EXPERIENCE

Software Test Analyst / Network Engineer | UL Technology Solutions Pvt Ltd

November 2019 – December 2023 • Kozhikode, Kerala, India

Network Engineer (Nov 2019 – Feb 2020)

- Configured and maintained network infrastructure including Cisco routers and switches.
- Monitored and troubleshoot LAN/WAN connectivity, VPN, and firewall configurations.
- Provided technical support for server environments and network services.

Junior Tester → Test Analyst (Mar 2020 – Dec 2023)

Project 1: Kerala Sabarimala Pilgrimage Accounts System

- Performed functional and regression testing for the Sabarimala pilgrimage accounts and accommodation booking portal as Junior Tester.
- Executed manual test cases covering end-to-end transaction flows, booking validations, and financial reporting modules.
- Logged, tracked, and verified defects using project management and bug-tracking tools.

Project 2: Kerala Kalamandalam HRMS & Accounts

- Progressed to Test Analyst role, responsible for test planning, test case design, and execution for the HRMS and accounts modules of Kerala Kalamandalam.
- Validated payroll processing, employee records, leave management, and financial account workflows.
- Coordinated with developers and business stakeholders to resolve defects and ensure timely delivery.

Project 3: Kerala Niyamasabha – Kerala Budget Module (Module Owner)

- Served as Testing Owner of the 'Kerala Budget' module within the Kerala Legislature (Niyamasabha) web application.
- Independently managed the complete test lifecycle — requirement analysis, test strategy, test case writing, execution, and sign-off.
- Ensured accuracy of budget allocation, financial data entry, reporting, and approval workflow functionalities.
- Acted as the primary QA point of contact for the Budget module between the client and development team.

Technical Support Engineer | CMS IT Services

March 2017 – March 2019 • MG Road, Thrissur, Kerala, India

- Configured and administered Windows Servers (2008, 2012, 2016) including DNS, DHCP, and WINS.
- Managed IIS web hosting, Group Policy, Domain Controller, and User Access Control.
- Handled network load balancing, firewall management, VPN/RDP setup, and Windows Server Backup.

- Performed PC troubleshooting, hardware assembly, printer/scanner support, and wireless network assistance.

Technical Support Engineer | Akshay Communication (SITI Networks)

May 2017 – May 2019 • Elamakkara, Kochi, Kerala, India

- Installed and troubleshot optical fibre connections including splicing and joining.
- Configured modems and broadband connections; resolved network and ISP connectivity issues.

CERTIFICATIONS

MCSA – Microsoft Certified Solutions Associate
Certification ID: 16616438 | Global

CCNA & CCNP – Cisco Certified Network Professional
Cisco Networking Academy

ITIL Foundation – IT Service Management
IT Service Management Certification

Certified Desktop Service Engineering
Hardware & IT Support

TECHNICAL SKILLS

QA & Testing	Manual Testing, Test Planning, Test Case Design, Defect Tracking, Regression Testing, UAT, Functional Testing, Module Ownership
